

R Notebook

This is the RMarkdown exercise

Load packages

loading package

load data

loading data from MAA package(1)

Add table

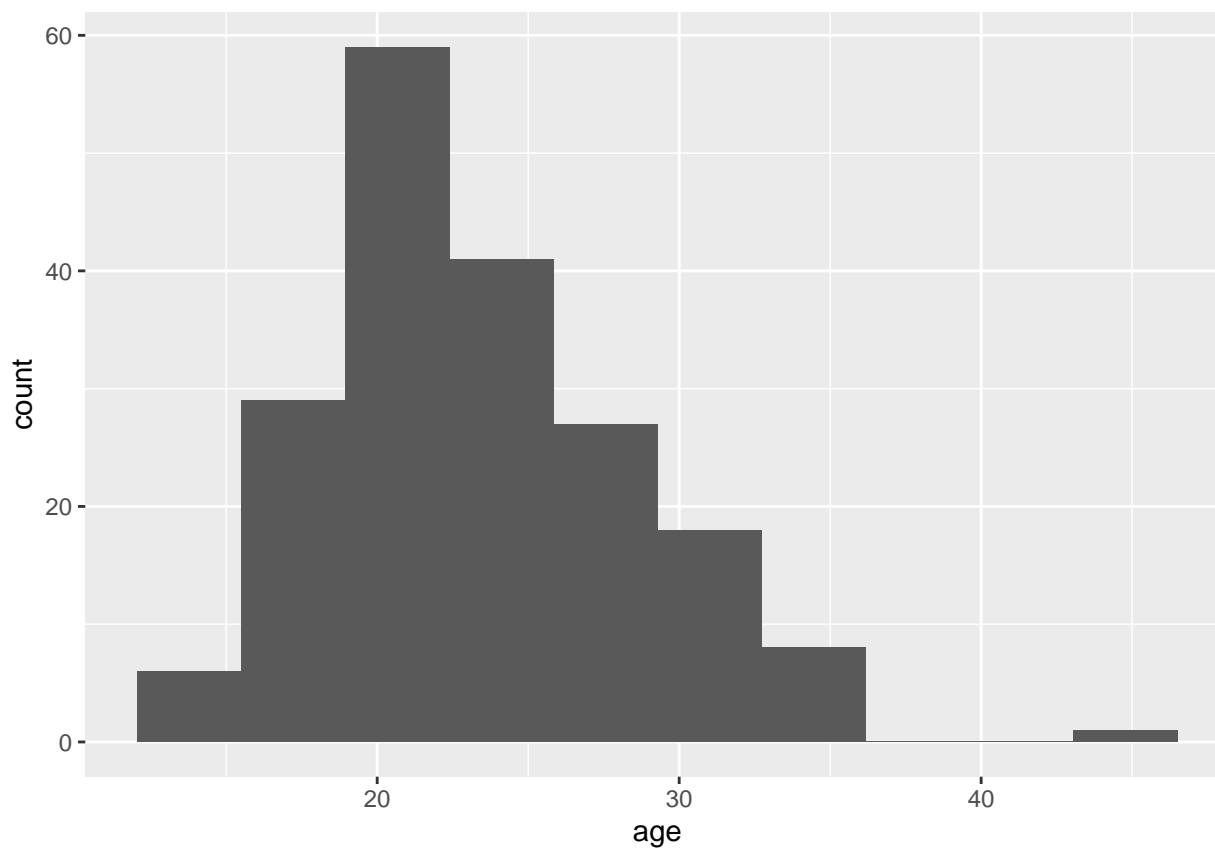

relationship between lwt and smoke(2)

A more elegant way of using RMarkdown

| Characteristic | 0, N = 115 | 1, N = 74 | p-value |
|----------------|----------------|----------------|---------|
| lwt | 124 (112, 142) | 120 (107, 137) | 0.2 |

Add Graphics

More elegant
